PROSITAN P-100

Protein filler

DESCRIPTION

Prositan P-100 is a protein filler which provides high filling and good body to the treated leathers. It penetrates well into the leather and provides selective filling to loose areas like flanks & bellies without affecting the chrome character of leather.

TECHNICAL SPECIFICATIONS

Appearance @25°C	: Biege powder
Solubility	: Not Soluble
pH 10%	: 7 - 8
Solid Content	: 98 %
Density @20°C	: 0.7 g/cm ³
Packing	: 25 kg bags on pallets

APPLICATIONS

Prositan P-100 has good dispersibility of its own and also helps in dispersion of other synthetic or vegetable tanning and retanning agents used with it. It provides compact, mellow and well filled leather and can be used for the production of various types of leathers like nappa, upper or upholstery etc.

To get optimal results, it is recommended to use **Prositan P-100**, 2.0 - 4.0% after completion of tanning & before fatliquoring.
