## **PROSIFY CB** Chrome basifying agent

### DESCRIPTION

**Prosify CB** is a safe, high quality basifying agent used in the tanning industry for efficient chrome fixation resulting in the production of high quality leathers.

### TECHNICAL SPECIFICATIONS

Appearance	: White powder
Nature	: Magnesium oxide
Active content	: 98 ± 2 %
Iron content	: Max 0.2 %
Shelf life	: 2 years
Packing	: 25 kg bags on pallets

### APPLICATIONS

**Procify CB** is a special magnesium oxide with a specific particle size distribution. It is used as a safe and effective basifying agent during the chrome-tanning process.

**Prosify CB** contains low levels of impurities and the controlled particle size supports its gradual and controlled dissolution for a slow and controlled basifying action. As a self-basifying agent for chrome tanning, it provides a slow, gentle rise in pH during basification. The carefully controlled particle size distributes the chrome uniformly and it provides a safe and consistent performance. The resulting leather shows a high shrinkage temperature.
